INNOVATION

Mont Adventure Equipment was conceived in Canberra in 1981 when we made our first down jackets and sleeping bags. Some twenty-five years down the track we are a dedicated team of adventurers who incorporate our bushwalking, skiing, climbing, cycling and travel experiences into developing and testing Mont products that allow you the freedom to enjoy life's great adventures.

Mont has been awarded multiple Australian design marks and patents, and our gear continues to set new standards. We now enjoy a reputation for innovative design and dependability achieved through an ongoing commitment to function, quality and performance.

Mont is proud to be an Australian company and the products we produce reflect our company's philosophy and heritage.

Mont – trusted in the wild for over 25 years.

SOMETHING BETTER

“It is unwise to pay too much. But it’s worse to pay too little. When you pay too much, you lose a little money, that is all. When you pay too little, you sometimes lose everything, because the thing you bought was incapable of doing the thing you bought it to do. The common law of business balance prohibits paying a little and getting a lot. It can’t be done. If you deal with the lowest bidder, it is well to add something for the risk you run. And if you do that, you will have enough to pay for something better.”

John Ruskin 1819-1900

Mont Lifestyle Clothing.

Comfort, function and style all rolled into one.

Colours:	 Black

Photo: Walking to the summit of Orizaba, Mexico – Jay Relly collection

Mont's Micro fleece range has been developed using a stretch micro polyester fleece that incorporates a new class of performance fibres known as T400.

Thermolite® fleece offers exceptional warmth for weight due to its ability to trap warm air both in the fleece pile and within the hollow core of the individual filaments that make up the pile.

Zute Jacket

Thermolite

Bushwalking, ski touring, climbing or travel the outstanding warmth to weight advantages of hollow fibre Thermolite fleece make the Zute jacket a versatile choice.

Features:

- Superior insulation offered by Thermolite®

Colours:	Black

Hammerhead Jacket

Perth to Sydney in less than 19 days. One rider, one bike and one very versatile cycling jacket — the Hammerhead. Totally uncompromised design for cycle touring it performs just as well as a genuine multisport jacket. It rides the competition to tears.

Features:

- WR underarm zips for enhanced ventilation
- Zip-off three piece storm hood
- Large rear storage pocket for spares and other goodies
- Neck, waist and hem drawcords to keep the cold blasts out
- Anatomical cut keeps you covered when your head is down
- Sleeve to hem reflective piping ensures that you won't be missed
- Chest utility pocket for small essentials

Fabric:	3 layer Ripstop Hydronaute PRO™
Weight:	630gms (M)
Sizes:	Unisex S, M, L, XL, XXL
Colours:	Tour Yellow

Mont's process of continuous design, testing and refinement results in alpine garments that offer unprecedented comfort in even the most extreme conditions.

Men's Supersonic Jacket

The challenges of alpine environments demand the very best in alpine shell technology. The Supersonic jacket made from high performance Hydronaute Pro™ fabrics and loaded with technical features offers unparalleled performance.

Features:

- Lumbar, shoulder and elbow panels in stretch Hydronaute Pro™
- Zip off multi adjustable storm hood with wired visor
- WR under arm zips for enhanced ventilation & breathability
- Internal bonded stretch pocket
- Two large chest pockets with WR zips
- Utility chest pocket with WR zip
- Articulated elbows for enhanced movement
- Fleece lined collar and laminated chin flap, single pull hem drawcord
- Laminated cuffs with Velcro adjustment
- Full length under zip flap

Fabric:	3 layer mini oxford Hydronaute PRO™ 3 layer Stretch Hydronaute PRO™
Weight:	800gms (M)
Sizes:	Men's S, M, L, XL, XXL
Colours:	 Salsa/Carbon

Men's Lightspeed Jacket

A fast and light, performance all terrain shell for lightweight bushwalking, mountaineering in the Southern Alps or backcountry skiing on the main range. Cut with room for a few extra base layers and features a great fitting hood.

Features:

- Water repellent main zip with storm flap
- Two chest pockets
- Two bonded internal pockets
- Shaped hem line with drawcord for increased rear protection
- Fleece lined chin and neck guard
- Water repellent pit zips
- Tuckaway, adjustable storm hood with visor and rear drawcords

Fabric:	3 layer Hydronaute PRO™
Weight:	540gms (M)
Sizes:	Men's S, M, L, XL, XXL
Colours:	 Saturn Blue/Deep Electric  Orange Crush/Carbon

Women’s Supersonic Jacket

Designed for women the Supersonic is our top end alpine shell. Combining hard wearing fabrics and classic lines the Supersonic offers outstanding performance and durability in the fiercest of alpine storms.

DESIGNED FOR
Women

Features:

- Lumbar, shoulder and elbow panels in stretch Hydronaute Pro
- Zip off multi adjustable storm hood with wired visor
- WR under arm zips for enhanced ventilation & breathability
- Internal laminated zip pocket
- Two large chest pockets with WR zips
- Utility sleeve pocket with WR zip
- Articulated elbows
- Fleece lined collar and laminated chin flap, single pull hem drawcord
- Laminated cuffs with Velcro adjustment
- Full length under zip flap

Fabric:	3 layer mini oxford Hydronaute PRO™ 3 layer Stretch Hydronaute PRO™
Weight:	760gms (12)
Sizes:	8, 10, 12, 14, 16
Colours:	Salsa/Carbon, Alpine/Carbon

Syncro Pants

A highly developed stretch 3 layer pant for alpine adventures. Marvel in the comfort and flexibility of wearing a full stretch Hydronaute Pro pant.

Men +
Women
SIZES

Features:

- Made from durable stretch Hydronaute Pro 3 layer
- Full length leg zips for hassle free removal over boots
- Articulated knees that can be fitted with knee pads
- High waisted design for extra comfort
- Two fleece lined zippered pockets
- Fly front with zip cover
- Double reinforced stretch layer on seat
- Knee and ankle reinforcements
- Snow and mud skirt built into cuffs

Fabric:	3 layer Stretch Hydronaute PRO™
Weight:	700gms (M)
Sizes:	Men's S, M, L, XL, XXL Women's 10, 12, 14, 16
Colours:	Carbon

Women’s Lightspeed Jacket

The ideal all terrain jacket designed specifically for women. The superior breathability of lightweight Hydronaute Pro™ makes this the perfect choice for the fast and light enthusiast.

DESIGNED FOR
Women

Features:

- Water repellent main zip with storm flap
- Two waterproof chest pockets
- Two bonded internal pockets
- Shaped hem line with drawcord for increased rear protection
- Fleece lined chin and neck guard
- Water repellent pit zips
- Tuckaway, adjustable storm hood with visor and rear drawcords

Fabric:	3 layer Hydronaute PRO™
Weight:	490gms (M)
Sizes:	Women's 8, 10, 12, 14, 16
Colours:	Saturn Blue/Deep Electric Orange Crush/Carbon

Lightspeed Pants

Combine the Lightspeed jacket with the pants for full storm protection. These comfortable, 3 layer overpants are ideal for skiing or mountaineering when weight, function and durability are the key considerations.

Men +
Women
SIZES

Features:

- Water repellent full length zips
- Zippered fly with press stud opening
- Articulated knees
- Elasticised waist with Velcro adjustment
- Velcro adjustable cuffs
- Under zip storm flaps
- Belt loops
- Gusseted inseam for increased mobility

Fabric:	3 layer Hydronaute PRO™
Weight:	400gms (M)
Sizes:	Men's S, M, L, XL, XXL Women's 8, 10, 12, 14, 16
Colours:	Carbon

Tempest Jacket

Our classic rain shell, the Tempest is an exceptional garment, which has long set the benchmark for technical rainwear. Made from Hydronaute Pro™ and now with an improved hood. Make the tempest your trusty companion when next you venture into the wilderness.

Features:

- Original ¾ length keeps your thighs covered
- Generous cargo waist level pockets with hand warmers
- Prym studs secure the storm flap over main entry
- Covered external chest pocket with water repellent zip
- Articulated elbows for full mobility
- Fully adjustable, fitted storm hood with visor and peripheral drawcords
- Waist drawcords to retain body heat

Fabric:	3 layer Hydronaute PRO™
Weight:	Men's 780gms (M), Women's 710gms (12)
Sizes:	Men's S, M, L, XL, XXL, Women's 8, 10, 12, 14, 16
Colours:	
Men's	 Saturn Blue/Deep Azure,  Eucalypt/Graphite
Women's	 Smoke Blue/Graphite,  Eucalypt/Graphite

Tempest Pants

If you're tired of having a wet rear end, slip into one of the best multi purpose overpants on the market. Walking or skiing, the full-length side zips allow you to keep your boots on even when taking the pants off.

Features:

- Reinforced articulated knees
- Mud and snow cuff
- Detachable braces and elasticised waist
- Full length water repellent zips
- 2 zippered jet pockets
- Fly front
- Ankle scuff patches

Fabric:	3 layer Hydronaute PRO™
Weight:	690gms (M)
Sizes:	Men's S, M, L, XL, XXL, Women's 8, 10, 12, 14, 16
Colours:	 Black

Bushwalking with Mont.

Classic Mont designs made from highly acclaimed Hydronaute™ and Hydronaute PRO™ Fabrics.

Austral Jacket

Tried and tested. The Austral is a traditional, all-purpose ¾ length bushwalking jacket that is equally practical as an around town or travel jacket. Tested in the worst imaginable conditions. Tough enough for the harshest scrub yet supple enough to look and feel comfortable around town.

Features:

- Fully seam sealed ¾ length jacket protects thighs
- Waist level cargo pockets
- Full length zip with double storm flap
- Large external chest pocket with water resistant zip
- Generous storm hood with visor drawcord

Fabric:	3 layer Hydronaute™
Weight:	660gms (M)
Sizes:	Unisex S, M, L, XL, XXL
Colours:	Salsa, Eucalypt Steel Blue

Siena Jacket

The Siena was designed with simplicity and functionality in mind. Whether you're walking in Tassie scrub, travelling around the world or for trips into town, this no-nonsense 3 layer rain jacket will withstand years of abuse.

Features:

- Seam-sealed 3 layer Hydronaute™
- Full length 2-way zip protected by double storm flap
- 2 large cargo pockets
- Large external chest pocket with WR zip
- Waist level drawcord helps retain warmth
- New improved hood

Fabric:	3 layer Hydronaute™
Weight:	570gms (12)
Sizes:	Women's 8, 10, 12, 14, 16
Colours:	Smoke Blue, Salsa

Austral and Siena Overpants

Simple, compact and lightweight overpants, ideal for weight conscious walkers. Austral (Men's), Siena (Women's)

Features:

- Knee length YKK zips for quick changes
- Elasticised waist and webbing belt
- Packs small for extended trips where space is important
- Gusseted inseam for increased mobility
- Velcro adjustable cuffs
- Articulated knees

Fabric:	3 layer Hydronaute™
Weight:	380gms (M)
Sizes:	Men's S, M, L, XL, XXL, Women's 8, 10, 12, 14, 16
Colours:	Black

Rappel Jacket

An all time classic, tough as nails. The Rappel jacket lives on as the workhorse of many outdoor Ed programmes.

Features:

- Seam sealed hood and neck
- Large zippered chest map pocket
- Storm cape protects shoulder seams and adds a durable second layer to shoulders
- Back mesh vent helps moisture vapour ventilation
- 2 large storage pockets
- Waist drawcord helps retain body heat

Fabric:	PU coated poly/cotton
Weight:	600gms (M)
Sizes:	Men's XS, S, M, L, XL, XXL
Colours:	Navy, Black

High Altitude Jacket

This is the jacket to take you to the top — the top of any 8,000 metre peak that is. Filled with 700+ loft Goose Down, (may contain small percentage of duck down) this jacket is designed purely for attempts on the world's great mountains. Every design detail has been crafted to achieve the delicate balance between warmth and weight, critical for any summit attempt.

Features:

- Goose Down minimum 700+ loft (may contain small percentage of duck down)
- Box walled construction including 8 chamber, 2 piece sleeves
- Tuck stitched for superior strength with articulated reinforced elbows
- Reinforced shoulder overlays
- 6 chamber hood with single pull drawcord and down filled muff
- Oversized underzip draft tube with anti-snap zip tape
- 2 large handwarmer pockets and 2 internal mesh storage pockets
- Internal waist and hem drawcords plus elasticised fleece lined cuffs with hook and loop closure
- Double storm flaps
- External chest and sleeve pocket

Fabric:	Ultra light & breathable Ripstop Hydronaute XT™, nylon taffeta liner
Weight:	1200 gms (M), 500gms down fill
Sizes:	Unisex S, M, L, XL, XXL
Colours:	 Mango/Black

High Altitude Pants

A totally refined technical down pant that completes our high altitude ensemble.

Features:

- Goose Down minimum 700+ loft (may contain small percentage of duck down)
- Box walled construction
- Articulated reinforced knees, reinforced inside leg and seat patch
- Full length side zips with hook and loop outer flap closure
- Oversized internal zip draft tubes with 50mm anti snag tape
- Elasticised adjustable waist with braces

Fabric:	Ultra light & breathable Ripstop Hydronaute XT™, nylon taffeta liner
Weight:	990gms (M), 300gms down fill
Sizes:	Unisex S, M, L, XL, XXL
Colours:	 Mango/Black

Icicle Jacket and Vest

Snow campers, climbers and even dog sledders from Minnesota will revel in the warmth of the Icicle Jacket and Vest. Packed with features including a zip off hood, reinforced shoulders and articulated elbows, the Icicle jacket is the first choice for any hard day on rock or ice.

Features:

- Goose Down minimum 700+ loft (may contain small percentage of duck down)
- Down filled zip off hood with drawcord
- Articulated reinforced elbows and shoulders
- Anatomical cut in rear to prevent cold spots
- Mont's unique side torso baffles maintain even down distribution
- Tuck stitched for superior strength and durability
- Fleece lined collar and cuffs
- Box walled construction
- Hem drawcord

Fabric:	Ultra light & breathable Ripstop Hydronaute XT™, nylon taffeta liner
Weight:	850gms (M), 260gms down fill (jacket) 460gms (M), 145gms down fill (vest)
Sizes:	Men's S, M, L, XL, XXL
Colours:	 Steel Blue/Black,  Ruby/Black,  Black

* Vest available in Black only.

Merlin Jacket

The Merlin down jacket offers the best of both worlds, contemporary urban street styling in a sophisticated technical down filled garment. Be warm on the street and in the mountains.

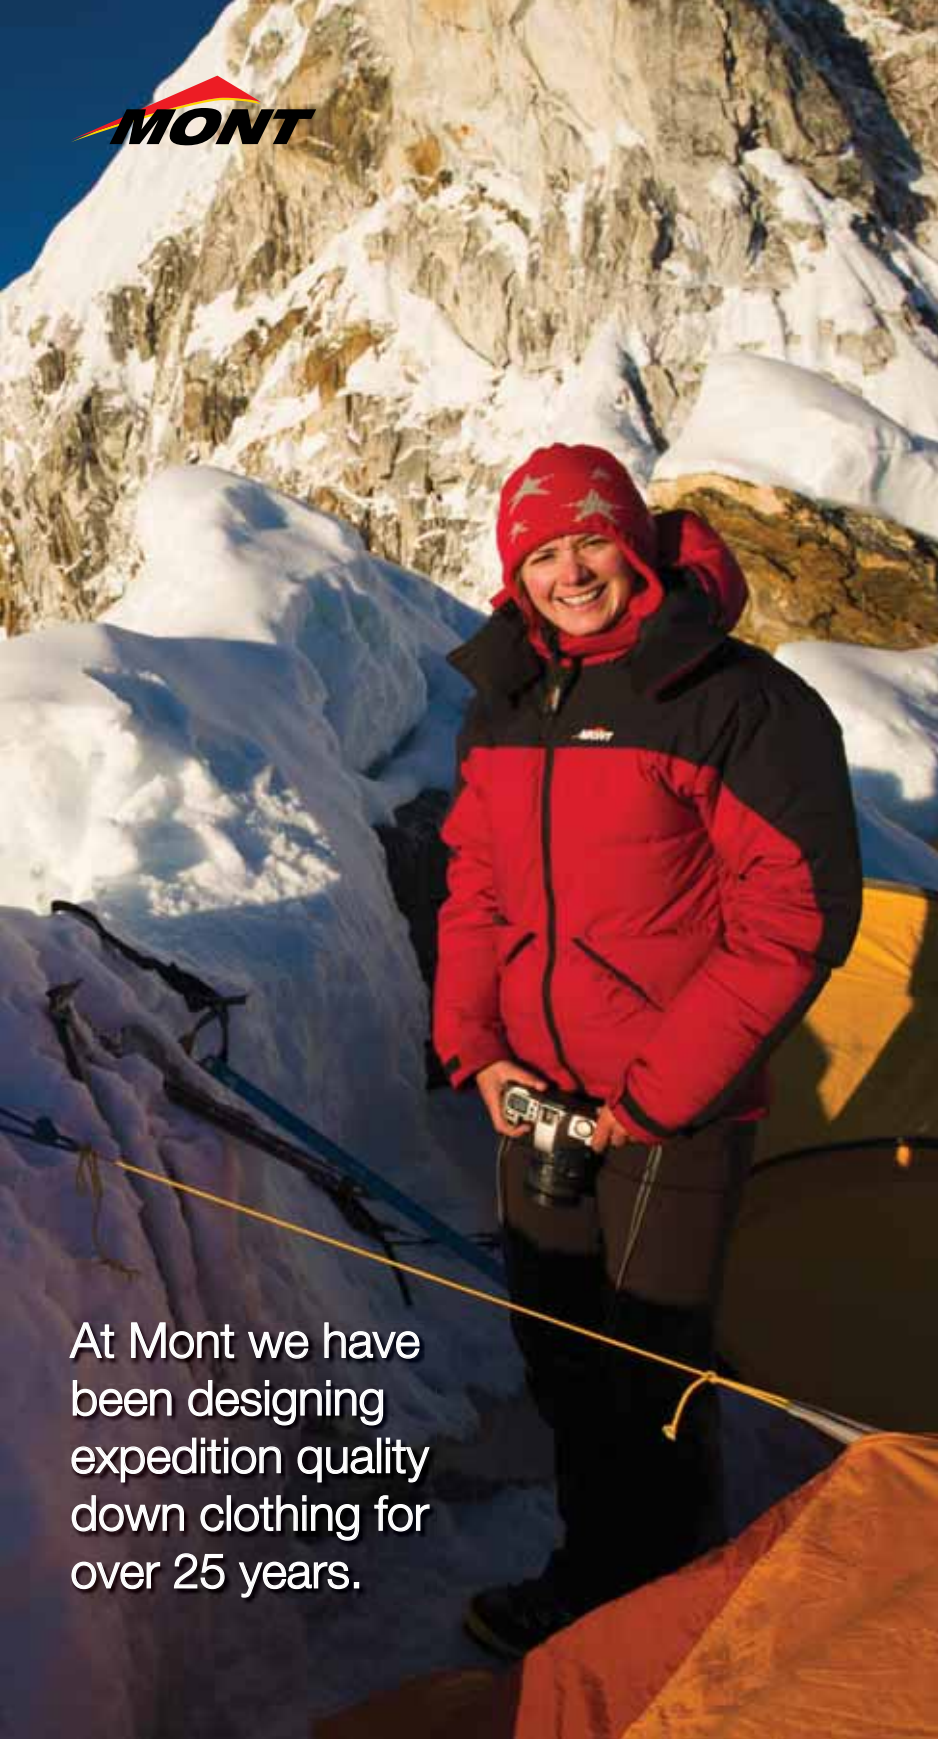

Features:

- Goose Down minimum 700+ loft (may contain small percentage of duck down)
- Unique side torso baffle maintains even down distribution
- Tuck stitched for superior strength and longevity
- Fleece lined cuffs & collar for warmth and comfort
- 2 lower zip pockets and internal security pocket
- Single pull elastic hem draw cord
- Hook and loop elasticised cuffs
- Compact storage bag included

Fabric:	Ultra light & breathable Ripstop Hydronaute XT™, nylon taffeta liner
Weight:	630gms (M), 200gms down fill (mens)
Sizes:	S, M, L, XL, XXL
Colours:	 Steel Blue/Black,  Black

At Mont we have been designing expedition quality down clothing for over 25 years.

Mystic Jacket

The Mystic down jacket offers the best of both worlds, contemporary urban street styling in a sophisticated technical down filled garment. Be warm on the street and in the mountains.

DESIGNED FOR
♀ Women

Features:

- Goose Down minimum 700+ loft (may contain small percentage of duck down)
- Unique side torso baffle maintains even down distribution
- Tuck stitched for superior strength and longevity
- Fleece lined cuffs & collar for warmth and comfort
- 2 lower zip pockets and internal security pocket
- Single pull elastic hem draw cord
- Hook and loop elasticised cuffs
- Compact storage bag included

Hydronaute XT

Fabric:	Ultra light & breathable Ripstop Hydronaute XT™, nylon taffeta liner
Weight:	570gms (12), 145gms down fill
Sizes:	8, 10, 12, 14, 16
Colours:	 Ruby/Black,  Black

Helium Jacket

The Helium jacket compliments our range of down jackets beautifully. We use premium down and ultralight ripstop nylon to make it really light and compact. Ideally suited to avid ultralight bushwalkers, summer mountaineers, and cold weather travellers. The sewn-through, quilted construction optimises warmth for weight.

DESIGNED FOR
♀ Women

Features:

- 800+ loft goose down (may contain small percentage of duck down)
- Lightweight 20 denier ripstop nylon shell
- Sewn through quilted construction
- Hem drawcord
- 2 lower zip pockets
- Internal zip security pocket
- Stuff sack provided

Weight:	325 gms
Sizes:	8, 10, 12, 14, 16
Colours:	 Espresso,  Black

Sleeping Bags

Making the world's best down sleeping bags is where Mont began, and for over 25 years our bags have been to the far corners of the world and to many summits.

Mont has a huge range of sleeping bags designed for all types of adventures and conditions.

Whether you're in a youth hostel in Europe, the Western Arthurs in Tasmania or the bitter cold at 8,000 metres — we have the bag to keep you warm.

New Technology.

Mont's range of Tapered Rectangular and Specialist Boxfoot sleeping bags are revolutionary in design. They feature these innovations:

- 1. The Radial Arc Baffle System™ is an internationally patented design that allows down to loft higher and spread more evenly around your body for superior warmth and comfort.
- 2. High quality down fill with increased loft power.
- 3. Superlight Hydronaute XT™ is the latest windproof, breathable outershell technology that protects the down from moisture.
- 4. The Oven Door foot design allows ventilation at the base when you need it.
- 5. Ultralight Silk Touch 30 Denier nylon inner provides soft, luxurious comfort.
- 6. The Toaster foot pocket allows the use of a natural air activated foot warmer to warm your toes.

Telemark XT

Specialist Boxfoot Series

Sophisticated design features combined with high loft Goose Down result in sleeping bags of unrivalled warmth. The Specialist Boxfoot Series will keep you warm in the most severe alpine conditions anywhere on earth. The lightweight models are ideal for bushwalking and spring ski touring. The mid range suit winter skiing or cold sleepers and the warmest bags suit extreme cold conditions and high altitude mountaineering. Chosen carefully, one of these sleeping bags will be suitable for a wide range of adventures for years to come.

Women's Specialist Boxfoot Series

Equality comes only through recognition and acceptance of differences. There is a difference between the basal metabolic rates of men and women, which is why, typically, women sleep 'colder'. The Mont Women's Specialist Box Foot sleeping bags accommodate this difference. The Mont Women's Specialist Boxfoot bags fit most women better, accommodating users up to 170cm tall. The internal shoulder circumference is 5cm less than unisex sleeping bags, the torso chambers are shorter and there's an extra 30 grams of 750+ loft down in the foot section.

Features:

- Radial Arc Baffle System on lower horizontal baffles
- Filled with Goose Down minimum 750+loft (may contain small percentage of duck down)
- Toaster foot pocket for air activated heat pad
- Hydronaute XT™ shell
- 30 denier silk touch nylon lining
- Generous box foot section
- Full length side zip for versatility and thermal regulation
- Oversized interlocking twin draught tubes along zip to retain warmth
- Differential cut prevents internal down compression
- Box wall chambers for lightweight warmth
- Vertical torso chambers on canopy and base maintain even down distribution
- Overall down distribution: 55% canopy, 45% base
- Cross block baffle prevents down shift between canopy and base
- Large contoured hood with hood muff reduces heat loss and cold spots
- Oversized collar muff with recessed drawcords for enhanced comfort and function
- Recessed drawcords for comfortable warmth retaining closures
- All models available in extra large
- Supplied with an ultralight Mont siliconised nylon compression stuff sack.

Radial Arc Baffle System.

The Radial Arc Baffle System™ is a Mont innovation in sleeping bag design that improves the loft and warmth of a sleeping bag.

Integral to this system is the relationship between the arc shape of the baffles, the differential cut of inner and outer shells and the overall difference in dimensions of the canopy and base width.

Each baffle of the Radial Arc Baffle System™ is cut in an arc shaped panel that enhances how the bag forms around the torso. This arc shape reduces the deformation and distortion of the baffle, significantly increasing the loft and warmth of the sleeping bag.

To maximise the radial arc effect, a substantial difference between the circumference of the inner and outer shell must be achieved. This is called a differential cut.

To further enhance the performance of the Radial Arc, we have increased the width of the canopy (top) so it more effectively forms around the torso. In turn, the width of the base is reduced.

The properties of the Radial Arc combine to produce a more thermally efficient bag than is possible using conventional construction.

Brindabella XT

Tapered Rectangular Series

Totally redesigned and newly released — our tapered rectangular sleeping bags are warmer and lighter than ever before. Featuring our new patented Radial Arc Baffle System, these bags set a new benchmark in sleeping bag technology. The versatility of the Mont Tapered Rectangular sleeping bags will make them a favourite with bushwalkers and ski tourers. They can be used over a wide range of temperatures by regulating the ventilation with foot and side zippers and adjusting the distribution of down between canopy and base. The semi rectangular shape also makes them ideal for those who like a little more room to move when they sleep.

Women's Tapered Rectangular Series

Equality comes only through recognition and acceptance of differences. There is a difference between the basal metabolic rates of men and women, which is why, typically, women sleep 'colder'. The Mont Women's Tapered Rectangular sleeping bags accommodate this difference.

The Mont Women's Aurora Tapered Rectangular sleeping bag will fit most women better, accommodating users up to 170cm tall.

Features:

- Radial Arc Baffle System (all percentage of duck down)
- Toaster foot pocket for air activated heat pad
- Differential Cut
- 30 denier silk touch nylon lining
- Unique Oven Door foot venting design
- Filled with Goose Down minimum 700+ loft (may contain sm)
- Nylon taffeta with Hydronaute XT™ foot section (also available in full Hydronaute XT)
- Full length side and foot zips to increase versatility
- Tapered Rectangular cut means a wide foot section for room to move
- Box wall chambers for warmth/weight efficiency
- No cross block baffle allows flexible distribution of down between canopy and base
- Oversized single 3D draught tube along zip to retain warmth
- All models available in extra large (except Aurora)
- Supplied with an ultralight Mont siliconised nylon compression stuff sack.

Hotwire and Nitro Extenders

Extend the range of your sleeping bag with one of these sleeping bag liners, or use them as an ultralight travel or summer sleeping bag.

Features

- Filled with Goose Down minimum 700+ loft (may contain small percentage of duck down)
- Constructed from lightweight, downproof 30 denier Nylon taffeta
- Double slider continuous coil zip allows two to be zipped together
- Reversible design for left and right handed use
- Horizontal baffle system allows flexible distribution of down between canopy and base
- Chambers without baffles to conserve weight
- Tapered rectangular cut for versatility
- Supplied with an ultralight Mont siliconised nylon compression stuff sack

— Nitro Extender features a lightweight half length zip

— Hotwire Extender features a lightweight full length zip and foot zip. Hotwire also features a hood with drawcord

Nitro Extender

Zodiac 500

Zodiac Series Sleeping Bags

A luxurious range of travel oriented sleeping bags. Affordably priced yet designed with all the features required to make any trip as comfortable as possible. The versatility of the Mont Zodiac sleeping bags makes them ideal for travellers and suitable for bushwalkers. They can be used over a wide range of temperatures by regulating the ventilation with foot and side zippers and adjusting the distribution of down between canopy and base.

The semi rectangular shape is ideal for those who like a little more room to move when they sleep.

Features

- Filled with Duck Down minimum 600+ loft
- Toaster foot pocket for air activated heat pad
- 30 denier silk touch nylon lining
- Unique Oven Door foot venting design
- 3 Dimensional foot panels for greater comfort and reduced cold spots
- Full length side and foot zips to increase versatility
- Tapered Rectangular cut means a wide foot section for room to move
- Box wall chambers for warmth/weight efficiency
- Horizontal baffle system allows flexible distribution of down between canopy and base
- Oversized single 3D draught tube along zip to retain warmth
- All models available in extra large
- Supplied with an ultralight Mont siliconised nylon compression stuff sack

Evolution Series
Sleeping Bags.

The Evolution Series is Mont’s range of high quality Polarguard® 3D synthetic sleeping bags.

We have combined over 25 years of sleeping bag design and manufacturing with high quality materials and components to develop a range of synthetic bags that offer exceptional value and performance.

The Mont Evolution series has shattered the myth that synthetic sleeping bags cannot be lightweight, compact and warm.

EVO Alpine Extreme

Evolution Boxfoot
Sleeping Bags

Our goal with the Evo Alpine Box-foot series was to create a new range of synthetic box-foot sleeping bags that are warmer and more compact than other synthetic sleeping bags currently available. The combination of shingle construction and Polarguard® 3D insulation were chosen for the superior warmth to weight and high compression values. Performance is also enhanced by a Radiant Heat Barrier which reflects body heat back towards the inner of the sleeping bag.

Features

Shingle Baffle Construction — the most durable, efficient and compact construction • Shell fabric is 40 denier Tactel nylon • Silk touch lightweight polyester micro fibre inner lining • Synthetic insulation – Invista Polarguard® 3D – continuous filament polyester insulation • Radiant Barrier technology – An ultralight radiant heat barrier throughout the bag reflects heat back towards the inner • Contoured 3 Dimensional hood • Large comfortable collar muff • Full length zip draft tubes • YKK zips • Internal pocket • Toaster foot pocket – For foot warming heat pad • Left and right bags can be zipped together • Supplied with a Mont compression stuff sack.

Key features of Shingle Baffle Construction

Sleeping bags with Shingle baffle construction offer vastly superior performance, are lighter, warmer and more compact than other synthetic sleeping bags. This complex construction technique takes almost twice as long to manufacture than a normal bag with sewn through quilting.

Key features of Invista Polarguard® 3D

- Superior warmth without the weight
- Highly compressible
- Machine washable and fast drying
- Moisture resistant
- Hypo-allergenic
- Will not shift, mat or clump
- Outstanding durability

Evolution Series Boxfoot Synthetic Sleeping Bags					
Model	Fill	Finished weight (g)	Max. user height (cm)	Shoulder circ.(cm)	Shell Fabric

Evo Alpine Extreme	Polarguard 3D	1700	185	160	40d Nylon Rip Stop

Evolution Tapered Rectangular Sleeping Bags

The Evo Tapered Rectangular series is well suited to many outdoor activities where versatility of the tapered design is required. They are ideal for use over a wide range of temperatures as temperature regulation is achieved with foot and full length side zips. The bags can also be completely unzipped to form a quilt if required. These models feature shingle construction in Polarguard 3D and a warmth enhancing Radiant Heat Barrier throughout.

Features

Shingle construction – the most durable, efficient and compact construction • Shell fabric is 40 denier Tactel nylon • Silk touch lightweight polyester micro fibre inner lining • Synthetic insulation – Invista Polarguard, 3D – continuous filament polyester insulation • Radiant Barrier technology – An ultralight radiant heat barrier throughout the bag reflects heat back towards the inner • Contoured 3 Dimensional hood • Large comfortable collar muff • Full length zip draft tubes • YKK zips • Unique Oven-door foot venting design • Internal pocket • Toaster foot pocket – For foot warming heat pad • Left and right bags can be zipped together • Supplied with a compression stuff sack

Evolution Ultralight Sleeping Bag

The Evo Ultra-light is the lightest and most compact of the Evolution series sleeping bags. It is ideally suited to lightweight travel and use in youth hostels. The weight and compactness of this model also makes it an ideal choice for adventure racing.

A continuous filament micro denier polyester has been used in conjunction with a light weight radiant heat barrier throughout to maximize performance.

Features

• Shell fabric is 40 denier Tactel nylon • Silk touch lightweight polyester micro fibre inner lining • Synthetic insulation – continuous filament micro polyester insulation • Radiant Barrier technology – An ultra-light radiant heat barrier throughout the bag reflects heat back towards the inner • Toaster foot pocket – For foot warming heat pad • Unique Oven Door foot venting design • Contoured 3 Dimensional hood with drawcord • Full length zip draft tubes • YKK zip • Left and right bags can be zipped together • Supplied with a compression stuff sack.

Sleeping Bag Technology

Radial Arc Baffle system.

The Radial Arc Baffle System™ is the latest Mont innovation in sleeping bag design that improves the loft and warmth of a sleeping bag through the unique shape and construction of the baffles. Each baffle of the Radial Arc system is cut in an arc shaped panel that enhances how the bag forms around the torso.

The curved shape of each baffle reduces deformation and distortion of the baffle, which significantly increases the loft and warmth of the sleeping bag.

The relationship between the radius of the baffle arc and the differential cut of the inner and outer shell is key to maximizing this effect and is one that cannot be achieved by standard straight cut baffle sections as used by other manufacturer's.

A dramatic reduction in the potential for cold spots is also achieved due to the substantial difference in circumference of the inner and outer shells.

This new concept in down sleeping bag construction is so significant that Mont has been awarded an international design patent.

The Radial Arc Baffle system is a true innovation in sleeping bag design by Mont.

Radiant Barrier Technology.

To further enhance the performance of Mont synthetic sleeping bags we have introduced an ultralight aluminium radiant barrier over the entire bag. The radiant barrier positioned directly adjacent to the outer shell is impregnated with a fine dot matrix of aluminium that

acts as a radiant heat reflector and helps to redirect heat back towards the torso, minimizing convective heat loss through the outer shell of the sleeping bag.

The Toaster.

Mont has a solution for cold feet!

The lower section of a sleeping bag is generally considered to be the most difficult area of a sleeping bag to warm due to the lack of heat generated by the feet. Mont has introduced a cleverly conceived pocket situated on the internal foot section of the sleeping bag that accepts a small heat pad. The safe, air activated, environmentally friendly heat pad when activated generates a comfortable level of heat that helps to warm the lower foot section of the sleeping bag for up to 10 hours. Place the activated heat pad in the bag well before you intend to bed down for the night for the best results.

Mont recommends using Heatmax™ heat pads.

Down Fills

Over the years we have spent an enormous amount of time and energy sourcing and testing the world's best down fills. We use a premium 750+ loft down in the Specialist Boxfoot series, 700+ loft down in our Tapered Rectangular series and 600+ loft down in the Zodiac series.

The Loft rating given to down fills seems to frequently suffer from manufacturer's hype and is not always accurate due to the seasonal variation in down quality.

At Mont we take the moral high ground and grade our loft ratings with the lowest test result, not the average.

The balance between loft and durability is also important to a sleeping bags performance. Many super loft downs look impressive

at first but can suffer from serious loft collapse, lasting sometimes no more than one expedition. Our down is selected for long-term warmth and durability.

What is loft?

Loft is the only true measure of down quality because it represents the volume of insulating air that the fill will trap to keep you warm.

Storage

To preserve the loft of your down sleeping bag it is recommended that when not in use sleeping bags should either be stored in a larger storage bag or hung in your wardrobe. The stuff sack is for in-field use only.

Ensure that your sleeping bag is completely dry before storage.

TIP: Turn your Hydronaute XT shell sleeping bag inside out before you stuff it into it's sack — much easier!

Shells

Insulation Protection for Sleeping Bags

Hydronaute XT™ fabric is the ultimate shell fabric — specially developed to protect sleeping bags and insulated clothing from warmth-sapping moisture.

High Quality Nylon Taffeta

Mont sleeping bag liners are a lightweight, high quality, downproof 30 denier Nylon taffeta. This high thread-count fabric is extremely breathable and has a fine silky feel so it's very comfortable against your skin.

Even so, we recommend you use an Inner Sheet to extend the life of your sleeping bag.

Threads

Mont sleeping bags and down clothing are manufactured with high quality, high strength threads.

Left and Right Hand Zips

Mont sleeping bags come in left and right hand zip options so they can be zipped together to form a double sleeping bag. We suggest, because of manufacturing

tolerances, if you intend to zip bags together, they should be purchased at the same time to ensure the same zip batch is used.

Because of their lightweight strength and durability, the YKK 5 gauge continuous coil zip is the best zip for sleeping bags. It's all we use. As well as using the best zips, we make them the easiest to use with anti-snap zipper tape stitched along the draught tubes.

Construction

Differential Cut — What is it?

Differential cut construction in our Tapered Rectangular and Boxfoot sleeping bags means that the internal circumference of the sleeping bag is smaller than the external circumference. It prevents the down in the canopy and sides from being compressed from the inside, which reduces the insulation potential.

Differential cut construction also reduces the material weight of the shell.

Baffle Materials

Lightweight, high quality Nylon lock-knit mesh is used to separate the down into chambers in Mont sleeping bags.

Chamber Design

Box Wall chambers are the lightest because they use less baffle fabric than any other configuration, while still affording highly efficient insulation.

Vertical and Horizontal Chambers

Mont Specialist Boxfoot Series sleeping bags have vertical torso chambers to prevent down shift around your body's heat generating core, regardless of your sleeping position.

Draught Tubes

All Mont sleeping bags feature an oversized 3D draught tube to stop your warm air being exchanged for cold through the zip. The Specialist Boxfoot sleeping bags feature a second 2D draught

tube along the bottom of the zip that interlocks with the 3D tube to efficiently retain your warmth even when you toss and turn.

Hood

More than 30% of your body's heat loss occurs through your head, which is why we've paid special attention to the design of the contoured hoods on all Mont sleeping bags. You'll notice they're larger than most to allow more down fill to keep your head warmer. Flat recessed drawcords ensure a comfortable seal around your face and neck without reducing the effectiveness of the down through compression.

Collar Muff

This chamber of down closes snugly around your shoulders and neck to keep more warmth in. When not in use it lies flat and out of the way even when two sleeping bags are zipped together.

Tuck Stitched

Tuck stitching attaches the lock-knit baffle fabric to a small fold in the shell material. It makes for a much stronger attachment than 'top stitching' with three layers of fabric instead of two. It also inherently protects the stitch from abrasion and snagging by concealing it internally.

Sizing Options

The standard Mont sleeping bag will comfortably fit a person up to 185cm (6'1"). Key models throughout the range are also available in Extra Large which accommodate users up to 200cm (6'6"). Extra Large models also have an extra 10cm internal shoulder circumference tapering to an extra 6cm at the internal foot circumference. The Women's Specialist Boxfoot sleeping bags accommodate users up to 170cm (5'7").

Mont sleeping bags — the best down under.

* The stated range is an indication of the potential comfort range and minimum temperature that may be possible. This should be used only as a guide in conjunction with the sleeping bag season rating. Ratings can vary dramatically dependent on whether the user is a warm or cold sleeper. Other factors that will determine a sleeping bags performance are metabolism, thermals, socks, headwear, an individual's health, fatigue, what you have eaten and the type of sleeping mat used. Hydronaute XT™ shell is likely to increase the warmth of a sleeping bag by 3-4 degrees.

Mont Backpacks are
'engineered to carry'

Photo: Beggary Bumps, Western Arthurs, Tasmania – Neil Blundy collection

Backcountry

The Backcountry is a traditional, hardwearing fully featured dual compartment canvas bushwalking pack. The Moto Active™ harness directly loads weight to the hips, which enables the Backcountry to carry expedition size loads in comfort.

Features:

- New Moto-Active™ harness directly loads the hipbelt
- Reinforced base made from High tenacity nylon
- Made from 8.8 ounce corespun canvas
- New hip belt design greatly improves comfort and carry
- Zippered access to lower compartment with zip away divider
- Large lid pocket with easy zip access
- Wand pockets
- Accessory webbing on base and lid
- Side compression straps.

Fabric:	High Tenacity Core spun Canvas
Sizes:	Women's, Medium, Large
Volume	70L, 80L, 85L
Weight:	2.94 kg (Med)
Colours:	 Sapphire Blue/Black,  Carbon/Black,  Moss/Black (Women's)

Pioneer

The Pioneer is a classic single compartment multi-day bushwalking pack for the purist. Mont's contoured, dual density hip belt and shoulder straps are designed to comfortably handle expedition-sized loads.

Features:

- New Moto-Active™ harness directly loads the hipbelt
- Made from 8.8 ounce corespun canvas
- Reinforced base made from High tenacity nylon
- Single compartment
- Large lid pocket with easy zip access
- Front vertical zip accessory pocket
- Reinforced 1000 denier nylon base
- Accessory webbing on base and lid
- Wand pockets

Fabric:	High Tenacity Core spun Canvas
Sizes:	Medium, Large
Volume	80L, 85L
Weight:	2.81 kg (Med)
Colours:	 Ruby/Black  Carbon/Black

Alpha

A new direction in lightweight durable bushwalking packs. The Alpha is ideal for multiday bushwalks or ski tours where weight and durability really count, made using tough, abrasion resistant fabrics. Mont's harness system directly loads weight to the hips improving support and enabling greater freedom of movement over difficult terrain.

Features:

- New Moto-Active™ harness directly loads the hipbelt
- Made from highly waterproof and abrasion resistant vx21 x-PAC 3 layer fabric
- Reinforced base made from High tenacity nylon
- Dual compartment with zip out divider
- Large lid pocket with WR zip access
- Back pocket with WR zip access
- Wand pockets
- Side compression straps
- Accessory webbing on lid.

Fabric:	X-Pac™ VX-21
Sizes:	Women's, Medium, Large
Volume	70L, 80L, 85L
Weight:	2.61 kg (Med)
Colours:	Blue/Black, Slate/Black

Flyte (Canvas)

The Flyte is a medium capacity, top-loading pack designed to withstand years of abuse. Ideally suited to the rough-and-tumble of school outdoor and Duke of Edinburgh programmes, or as your first rucksack. The Flyte offers fantastic load carrying comfort in a simple, affordable, and rugged hiking pack.

Features:

- Traditional style, single compartment, top-loading pack
- Adjustable Novo-Lite™ harness
- Vertical entry back pocket
- Wide flip-top lid pocket
- Reinforced base
- YKK zips
- Side compression straps

Fabric:	High Tenacity Core Spun Canvas
Sizes:	Small, Medium, Large
Volume	65L, 70L, 75L
Weight:	2.6 kg (Med),
Colours:	Various colours

Escape

Completely new for 2008, the Escape is the ideal pack for shorter multiday walks or for the weight conscious bushwalker. Made from the same highly waterproof and durable X-PAC 3 layer fabric used in the Alpha, and built around the Moto-Active harness for optimum carrying capability.

Features:

- New Moto-Active™ harness directly loads the hipbelt
- Made from highly waterproof and durable X-PAC 3 layer fabric
- Reinforced base made from High tenacity nylon
- Front storage pocket with WR zip entry
- Dual compartment
- Large lid pocket with WR zip entry
- Ice axe loop and base compression straps
- Wand pockets

Fabric:	X-Pac™ VX-21
Sizes:	Women's, Medium, Large
Volume	65L, 70L, 75L
Weight:	2.48 kg (Med)
Colours:	Blue/Black, Slate/Black

Flyte (Nylon)

Available in a tough 1000 denier nylon, the Flyte retains the same features as its canvas counterpart. Ideally suited to the rough-and-tumble of school outdoor and Duke of Edinburgh programmes, or as your first rucksack. The Flyte offers fantastic load carrying comfort in a simple, affordable, and rugged hiking pack.

Features:

- Traditional style, single compartment, top-loading pack
- Adjustable Novo-Lite™ harness
- Vertical entry back pocket
- Wide flip-top lid pocket
- Reinforced base
- YKK zips
- Side compression straps

Fabric:	1000 denier nylon
Sizes:	Small, Medium, Large
Volume	65L, 70L, 75L
Weight:	2.45kg (Med)
Colours:	Charcol/Black

Experience Astro travel.

A revolution in design
and function.

Astro Travel Pack

The Astro Travel Pack is a revolution in design and function that forms a complete travel system. This Mont innovation has been awarded a design patent.

Astro Travel Pack includes a host of innovations such as a Clam Shell opening that allows total access to the main compartment and the Astro Travel Pod, which converts to carry-on luggage.

The Astro's clean, classic lines conceal its ability to carry substantial loads when combined with the Astro Travel Pod and the fully featured 25L Astro Day Pack.

Experience Astro Travel today.

Astro Travel Pack

Astro Day Pack

Astro Travel Pod

Astro Cruiser

The wheelee with a difference. The Astro Cruiser combines the key styling and functional features of the Astro Travel Pack in a large capacity roll-on luggage ensemble. Using Mont's bombproof construction and styling it's designed to stand up to anything your travels might encounter.

Astro Cruiser

Astro Satchel

Astro Travel Pod

Astro Travel Pack Features

- The full length zip Clam-Shell opening offers absolute access to all areas of the main compartment making it ideal for packing or customs security checks.
- One half of the Clam-Shell features the unique zip-in Astro Travel Pod that helps you stay organised and can be removed for storage or hung on a door.
- For your return journey, the Astro Travel Pod converts to an extra carry-on bag increasing your capacity.
- No longer a typical zip-on day pack, the Astro Day Pack slips neatly into its own lockable compartment away from prying eyes. It can also be clipped onto the front of the harness or the rear of the pack providing several carrying options.
- Fully adjustable Moto-Active Harness™ in 3 sizes.
- Internal compression straps to secure your general load and sleeping bag.
- Internal zip pockets.
- The main zips on the Astro have lockable YKK sliders, making your gear safer.
- Tough 500/1000 denier nylon construction for maximum durability.
- Clean uncluttered design reduces the chance of damage on luggage carousels.

Astro Cruiser Features

The Astro Cruiser features the unique zip-in travel pod that can convert to carry-on luggage, and the handy Astro Carry Satchel. Available in 80 litres and 100 litres.

- Completely opens up at the top, side and base providing great access to the main compartment making it ideal for packing or customs checks
- The zip-in Astro Travel Pod helps you stay organised and can be removed for storage or hung on the door
- For your return journey, the Astro Travel Pod converts to an extra carry-on bag increasing your capacity
- The Astro Satchel is a casual brief case style bag that keeps you well organised with plenty of internal sleeves and pockets and a padded compartment for laptop computers. It has a lockable zippered main entry, removable shoulder strap, and iPod port
- The Astro Carry Satchel slips neatly into its own lockable front compartment, or slides down over the luggage arm
- Extendable, lockable luggage arm and bombproof materials for scooting around Heathrow
- Sits upright
- Multiple internal storage pockets
- Internal and external compression straps to secure your load
- Internal zip pockets
- All zips on the Astro have lockable YKK sliders making your gear safer.
- Tough 600 CPR coated nylon construction for maximum durability
- Clean, uncluttered design reduces the chance of damage on luggage

Zyro

The Zyro is a large capacity time-honoured travel pack and the pack of choice for the trip with no foreseeable end. With a separate, stow away daypack, this year's Zyro is more versatile than ever.

Men + Women

Features:

- Moto Active™ harness system
- Dual compartment with zip out divider
- Quick front access and fold away harness cover
- Fully lockable YKK zip sliders and multiple internal pockets
- Twin handles
- Tuck-away shoulder strap
- 25ltr dual compartment day pack with internal zip pocket
- Daypack features hydration sleeve and side bottle holders.

Fabric:	1000 denier AT nylon
Sizes:	Women's, Medium, Large
Volume	75L, 80L, 85L
Weight:	2.95 kg (Pack), 740g (Day pack)
Colours:	Charcoal/Black, Smoke/Black

Jetson 40, 50 Travel Pack

A sleek, low volume travel pack, perfectly suited to business trips to Asia or interstate overnights. The 40litre Jetson and the brief case style satchel will be an indispensable companion to keep you well organised.

Features:

- Available in 40 or 50 litres
- Adjustable harness
- Jetson satchel fits into front pocket
- The full length zip Clam-Shell style opening offers complete access to the main compartment for ease of packing
- Internal, zippered mesh storage pocket
- Tough 500/1000 denier nylon construction for maximum durability
- Fold away harness cover
- The zips to the main compartment and front pocket have lockable sliders for added security
- Top and side carry handles, as well as a removable shoulder strap
- Reinforced base

Fabric:	500/1000 denier AT nylon
Sizes:	40L, 50L
Weight:	2.65kg (Jetson 40)
Colours:	Electric Blue/Deep Azure, Charcoal/Black

Footprint

The Footprint is designed specifically for women who find that a full size 80ltr travel pack is just too big to carry comfortably. The Footprint has the same features and harness system as the Zyro but the slimmer profile makes it easy to haul around.

Features:

- Moto Active™ harness system
- Dual compartment with zip out divider
- Specific women's cut, slim profile
- Fold away harness cover
- Fully lockable YKK zip sliders and multiple internal pockets
- Tuck-away shoulder strap
- 25ltr dual compartment day pack with internal zip pocket
- Daypack features hydration sleeve and side bottle holders.

Fabric:	1000 denier AT nylon
Sizes:	Women's
Volume	60L
Weight:	2.90 kg (Pack), 740g (Day pack)
Colours:	Smoke/Black, Charcoal/Black

Daypack for Zyro and Footprint.

Sphere

The Sphere is the pack for those who like a little adventure with their travel. Whether trekking or travelling abroad here is a pack versatile enough to take just about anywhere.

Features:

- New overall dimensions and refined shape for 2008
- Moto-Active harness directly loads the hipbelt
- 25ltr dual compartment day pack that zips away into back pocket
- Reinforced base made from High tenacity nylon
- Wide opening lid design provides easy access
- Hybrid design with quick access front opening
- Dual compartment with zip out divider
- Fully lockable YKK zip sliders
- Large internal mesh storage pocket
- Side handle

Fabric:	High Tenacity Core spun Canvas
Sizes:	Women's, Medium, Large
Volume	67L, 80L, 85L
Weight:	Pack 3.6 kg (M), Daypack 700 gm

Innovation harnessed

Introducing Mont's Moto Active™ and Novo Lite™ adjustable harnesses.

Moto Active™ Harness System

The Moto Active™ harness represents great load carrying comfort for mid to high volume packs as found in our travel and bushwalking models. It offers efficient weight transfer and excellent adjustability. Weight transfer is accomplished by way of two frame stays inserted directly into the hip belt. It also features upper and lower stabilisers to assist with load transfer between the shoulders and hips. While adjustability in shoulder length means the frame fits a wider range of body types. The Moto Active harness remains stable and comfortable under load thanks to the dual density, contoured hipbelt and shoulder straps. It is available in Women's, Medium and Large back lengths.

Novo Lite™ Harness System

The Novo Lite™ harness represents comfortable and efficient load carrying for small to mid volume packs. It now provides greatly improved adjustability to accommodate a wider range of body types.

It features a contoured dual density hipbelt and shoulder straps, and upper and lower stabilisers to assist with weight transfer. It has a lightweight, rugged construction and is available in Women's, Medium and Large back lengths.

Mont Harness Sizing Chart*

Back Length	Moto Active™ Adjustable	Novo Lite™ Adjustable
40cm	Women's	Women's
40-45cm	Medium	Medium
45cm +	Large	Large

*TIP: To use the sizing chart you'll need to know the length of your back (experienced shop staff will be able to judge well by eye). Measure from your C7 vertebrae down to the point level with the top of your hipbones. The C7 vertebrae is the one that sticks out prominently at the back of your neck when you tilt your head forward. Use this measurement as a rough guide for the sizing chart. The best way to evaluate your harness choice is to load the pack up with about 12 kg in the store and go for a bit of a wander, much as you would when trying on a new pair of boots.

Moto Active™ Harness

Novo Lite™ Harness

Materials Exposed

Mont packs are constructed with some of the most advanced materials and components available — making them the lightest, strongest and most comfortable packs for their function and purpose.

EvaZote™ Foams

Premium quality EvaZote™ closed cell foam is used in Mont Shoulder straps and harnesses. EvaZote™ foams are the world's best and are extremely resilient and maintain their shape over many years of hard use.

Duraflex™ Buckles

Only premium quality Duraflex™ buckles are used in Mont backpacks. Their nylon composition and patented design make them virtually indestructible and very easy to use.

High Tenacity Core Spun Canvas

The classic Australian canvas. A specially milled Australian made high tenacity 8.8 ounce core spun canvas fabric is used in Mont's canvas backpacks. It provides excellent durability, waterproofness, abrasion resistance and UV protection.

X-Pac™ VX-21

X-Pac™ fabric is constructed by laminating a mesh of polyester between layers of nylon fabric. This creates an extremely tough fabric that is tear resistant, waterproof and very lightweight. X-Pac™ VX-21 has been chosen in Mont's range of technical bushwalking packs because it delivers the ideal balance between weight and durability.

1000d Waterproof Nylon

Our travel packs and the base of our bushwalking packs feature an incredibly strong and abrasion resistant 1000d nylon fabric with a special coal coated waterproof PU finish on the inside face. These fabrics will survive the toughest conditions.

Aluminium Frame

The T6-6261 Aluminium Frame stays are incredibly light, strong and resilient.

YKK™ Zips and Nylon Webbing

Mont backpacks feature only genuine YKK™ zips and sliders, the strongest and most durable zips in the world. We use high quality nylon webbing which are manufactured to stringent military specifications.

Seam Binding

All points of high stress such as webbing attachments are triple stitched using a premium thread. All seams are then bound with a special narrow woven nylon binding and then stitched again. That's up to five rows of stitching for extra strength and durability.

BodyTouch 3D Mesh

On the harness we use a special three dimensional, wicking air flow mesh for body contact areas. This mesh features a strong sandwich construction that can wick moisture away, and dries fast, as air moves freely within its construction.

Custom Pack Sizing

We make most of our Mont backpacks in three back lengths, and those with the Moto Active™ Harness also have Interchangeable components to give you the very best fit for long term carrying comfort. Fine tuning the fit of your backpack often needs to be done while you're on the track carrying a full load, so the following notes will help you understand the principles in pack fitting. Your Mont retailer will be able to guide you in choosing the correct model and size of pack for your adventure and assist in the fitting of the pack.

Mont Hip Belt

Mont hipbelts are designed with ergonomic, load carrying comfort in mind. They incorporate dual density foam and a third layer of ultra-high density contoured foam along the split support wings. The hipbelt pulls inwards and draws in tension along the top and bottom support wings, thereby distributing weight across the entire hipbelt.

In conjunction with dual rear attachment points, it is also possible to 'lock off' the direction of pull of the hipbelt by simply rethreading the main buckle. This allows for more precise adjustment and fit of the hipbelt.

Hip Belt Sizing

Mont interchangeable hipbelts are available in three sizes. The Women's is more radically flared and a little flatter to accommodate female hips, while the Medium and Large are more universally styled.

Harness Sizing

Both the Moto Active™ and Novo Lite™ harness systems are available in a range of sizes and styles. The women's sizes have more contoured, slightly narrower shoulder straps so they fit women better. The medium and large are more universally styled to suit men and women with a larger bone structure.

A Great Fit

The best way to get a great fit from a Mont pack is to have an experienced staff member at your favourite shop help you out, but here are the basics.

- Loosen all of the straps then do up and tighten the hip belt snugly.
- The middle of the hipbelt should fit snugly over the hips.
- Tighten the shoulder straps then the stabiliser straps between the tops of the shoulders and the top of the pack frame. If the pack does not fit quite right, you may need to adjust the back length by adjusting the position of the shoulder yoke on the Moto Active™ harness or Novo Lite™ harness. The curvature of the Frame Stays may also need adjusting.
- With light to moderate loads you may not need to use the sternum strap, but for heavy loads, do up the sternum strap for extra stability.
- Finally tighten the stabiliser straps between the hipbelt and the base of the pack.

Packing Smart

On short walks and daytrips when the loads are relatively small, packing is not a big issue. However as loads become heavier, the way in which this weight is distributed within the pack becomes critical to how comfortable your pack is to carry. A poor packing job can leave you fatigued and sore at the end of the day. Here are a few simple hints to help you get it right and to make the most of your Mont Backpack and your outdoor experience.

- The base section of the pack should be reserved for bulky lightweight items. It's an ideal place for your sleeping bag and other bulky items that you will not need until nightfall.

- Above your sleeping bag, position heavy items such as tent, food bags and climbing gear against the back panel, as this will improve the centre of balance. Behind the heavy gear, pack medium weight items. Lightweight equipment should get packed to the outside away from the harness.
- For activities such as climbing and backcountry skiing where balance is important, avoid packing really heavy items at the top of the pack.
- Use pockets and the lid for snacks, sunscreen and other small items you will need during the day. Accessory straps on the lid and the base are ideal for your camping mat.
- Allow room for your rain shell and a piece of warmwear at the top of the pack so they can be accessed easily if weather conditions take a turn for the worse.

Care & Cleaning

We hope you get your new Mont backpack really dirty because we made it to have a lot of fun in some pretty wild, and not necessarily clean places. When you do bring it home filthy and wet, here's a few pointers to help you get the most out of your pack for years to come.

Use a soft, fine bristled brush and luke warm water to clean off as much dirt as possible. Rinse well, a hose on the back lawn does the trick. Be careful not to use strong cleaning agents and detergents as these may damage the waterproof properties of the fabrics.

Drip dry in the shade, in a warm breezy place. Do not dry your pack in front of a heater. It's important to store your pack dry, as damp canvas can become mouldy. To remove any mould, use one of the commercial preparations available from your favourite outdoor shop.

Mont tents are back!

Mont Tents

The Krypton and Moondance lead a new series of tents designed specifically for the Australian market.

Years of design, experience and testing have gone into the construction of Mont's new range of lightweight bushwalking tents.

Designed with Australian conditions in mind, the Krypton and Moondance tents feature the latest high tech materials, sturdy tub floors, and the sort of attention to detail Mont is renowned for.

Mont tents are durable, comfortable, easy to pitch and are built from the ground up with the extremes of their intended end-use in mind.

Photo: Field testing the Krypton tent below Club Lake, Kosciuszko NP – Craig Day

Krypton Tent

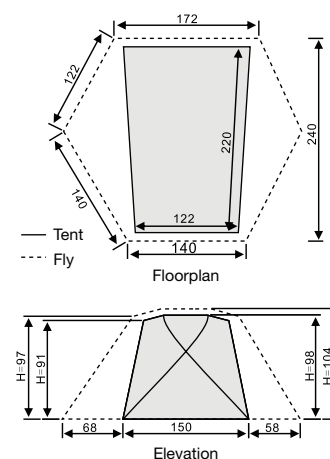

The innovative new Krypton tent is the perfect 3-4 season bushwalking tent and features a sewn-in footprint providing added protection and versatility to an already sturdy shelter.

The Krypton is a versatile, lightweight, freestanding 3-4 season, multi-pitch tent designed in Australia, for Australian conditions. It features a sewn-in footprint, made from heavy duty coated nylon, which acts not only to protect the inner floor from moisture, dirt and abrasion, but also allows the tent to be used as a stand-alone fly with integrated floor for the fast and light market.

Features:

- Freestanding 3-4 season 2 man tent
- Multi-pitch design
- Inner toggles attach inner and outer tent together
- 3 DAC Featherlite poles crossing over at 4 points for unparalleled rigidity
- Colour coded webbing and poles
- Locking pole ends
- Siliconised nylon on the fly and inner floor
- PU coated integrated sewn in footprint
- Dual vestibules
- Dual vents
- Removable storage loft included
- No-See-Um insect mesh
- 4 storm guys

Capacity	2 Person
Packed Weight	2.98 kg
Fast & Light Weight	1.90 kg
Minimum Weight	2.05 kg
Floor Area	3.0m ²

Moondance 2 Tent

This sturdy, locally designed 2-person ultralight tent is an excellent choice if weight and bulk are your primary considerations. For adventure racing teams and lightweight dreams, it's a marvellous night for a Moondance. At under 2 kg, the Moondance series of Mont tents are true ultralight models and feature tough floors and great ventilation for those looking to minimize weight without compromising durability.

Features:

- 2 person capacity • 3 Season • 2 entrances • 2 DAC Featherlite™ poles with wishbone hub design • Heavy duty 10,000mm PU Coated, taped, bucket floor • Lightweight fly • Partial 40d ripstop nylon and No-See-Um mesh inner tent provides good air circulation • 4 reflective guys • Toggles attach inner tent to outer fly • Colour coded webbing and locking pole ends

Capacity	2 Person
Packed Weight	1.98 kg
Minimum Weight	1.86 kg
Footprint Weight	188g
Floor Area	2.66m²

* Minimum weight includes inner, fly, poles and 2 x pegs only.

Moondance 1 Tent

At just 1.6kg, the Moondance 1 is the ultimate fast and light minimalist tent. It features a heavy-duty floor and good ventilation and is sure to become a favourite with the solo walker, adventure racer or cycle tourist.

Features:

- 1 person capacity • 1 Entrance • 3 Season • 2 DAC Featherlite™ poles with wishbone hub design • Heavy duty 10,000mm PU Coated taped, bucket floor • Lightweight fly • Partial 40d ripstop nylon and No-See-Um mesh inner tent provides good air circulation • 4 reflective storm guys • DAC pole hooks used to attach inner tent to poles

Capacity	1 Person
Packed Weight	1.59 kg
Minimum Weight	1.47 kg
Footprint Weight	188g
Floor Area	1.74m²

* Minimum weight includes inner, fly, poles and 2 x pegs only.

Tent Technical Specifications

DAC Featherlite™ Poles

We use DAC Featherlite™ poles in our 2 and 3 season Mont tent range. The DAC Featherlite™ poles are less susceptible to failure and are lighter than poles using glued ferule inserts because they utilize tapered linkages without an extra insert piece. The DAC pole system is also field repairable with screw on tips allowing easy adjustment of shock cord.

DAC Pole hooks

On the Moondance tents, the inner tent is attached to the poles via a system of DAC pole hooks, which are designed to be secure, robust and easy to use.

DAC Wishbone hub

The DAC hub facilitates the Y-shaped, wishbone pole configuration featured in the Moondance series of Mont tents.

Fly Materials

The Krypton tent uses coated silicone polymer fabrics, known as 'sil-nylon'. Individual nylon yarns are encapsulated in a silicon polymer then woven and coated with PU to create the sil-nylon fly material. The PU coating on the face enables seams to be seam sealed. This sil-nylon is significantly stronger and lighter than PU coated ripstop nylon and is far more resistant to UV radiation over long periods.

To minimise the weight of the Moondance series we use a PU coated 40 denier polyester rip-stop fabric featuring high UV resistance.

Floor materials

Moondance - 70d 210T Nylon with 10,000mm PU coated taped, bucket floor.

Krypton - 70d 210T Nylon 5000mm coating (Outer). Inner 30d Sil nylon.

Footprints

In the bush, take care to select a clear tent site, avoiding sharp objects like sticks, which can damage the tent floor. Moreover, to preserve the floor of your tent, we recommend using a ground sheet or optional Footprint where possible. Footprints for the Moondance series of ultralight tents are available from Mont stockists.

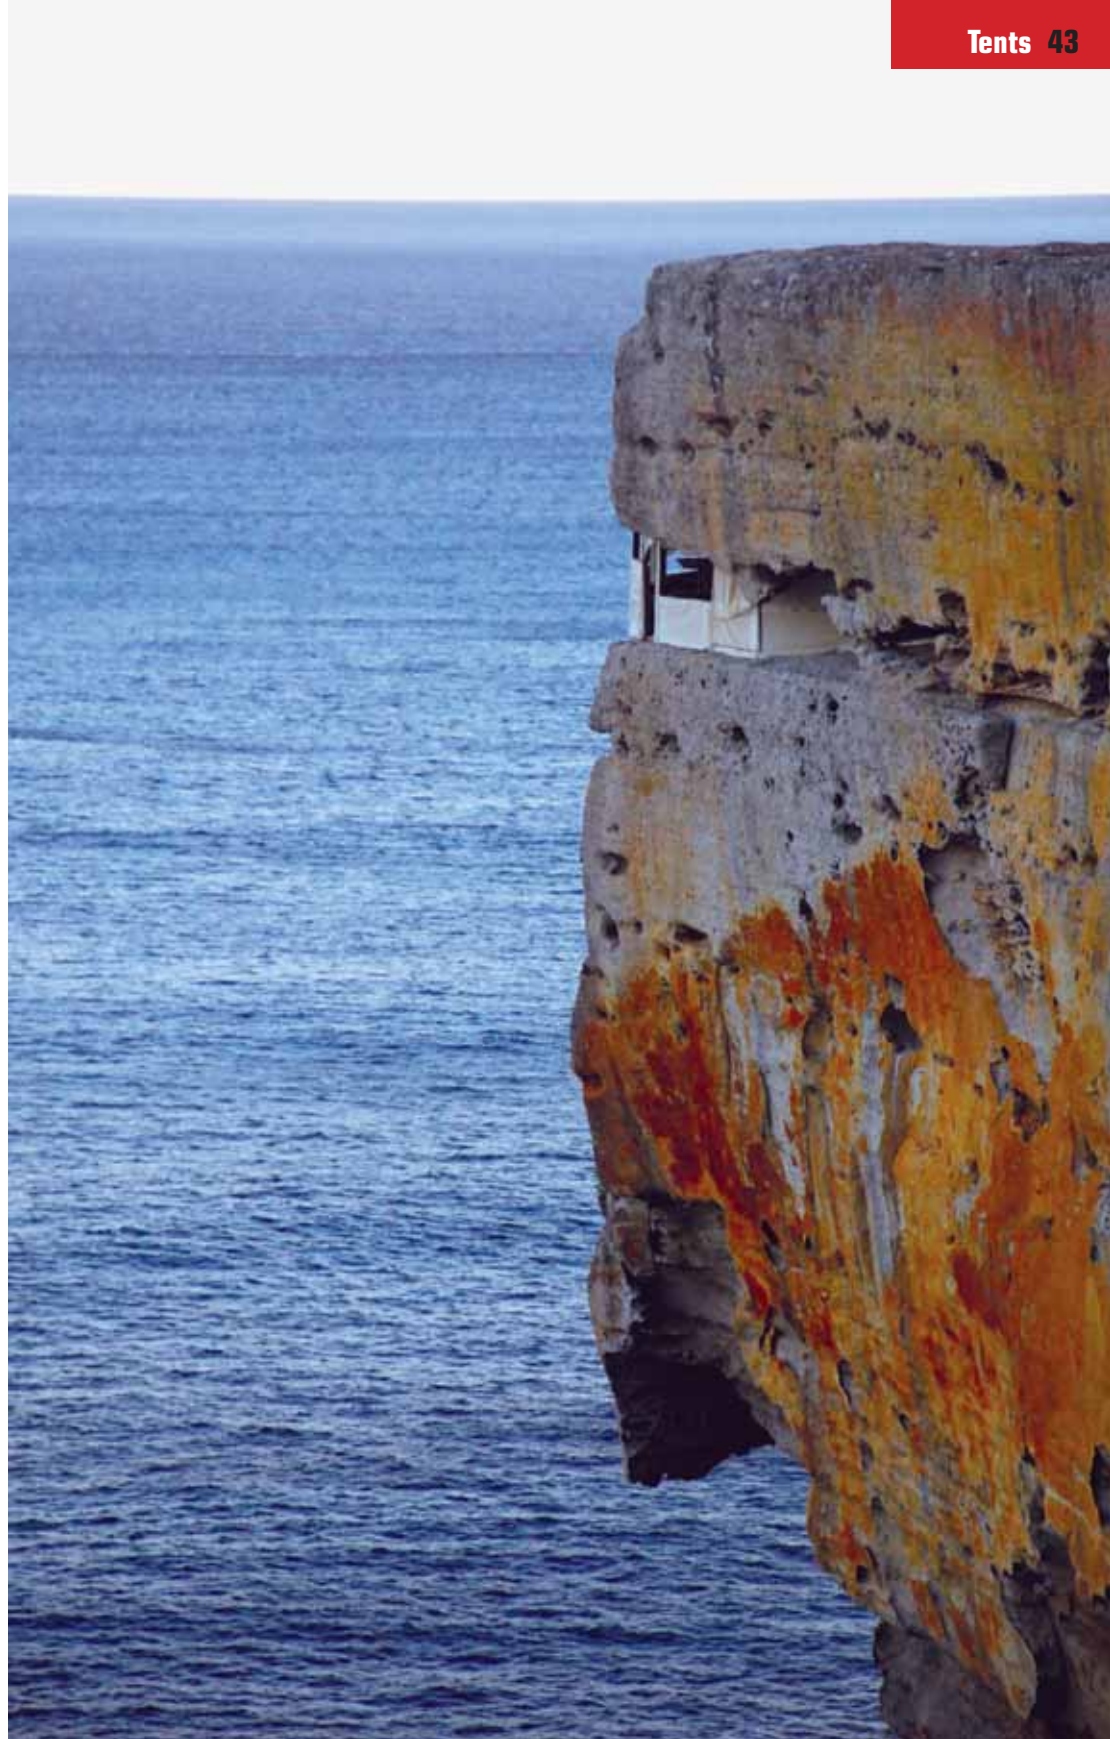

Care instructions – Storage, Cleaning and Maintenance

Unfortunately tents spend most nights stuffed in a cupboard somewhere, rather than pitched under the stars where they belong. So to preserve the condition of your tent, the best thing you can do is make sure it's dry before you put it away.

When you get home, unpack the tent and check that it's totally dry. Double-check areas where the fabric overlaps, like seams. Store the tent in a cool, dry place and avoid exposure to high temperatures (like in a hot car), which can damage fabric coatings. If the poles were exposed to salt air, rinse them in fresh water and let them air-dry to prevent corrosion.

To clean your tent, set it up and wipe it down with a sponge or hand-wash it in cold water, then allow it to air-dry completely. Do not machine-wash a tent. Consider leaving stubborn stains like sap in place, and dust them with something like talcum powder to prevent undue stickiness.

Mont Essentials.

Comfort, function and style all rolled into one.

Silk Travel & Sleeping Bag Liner

Mont 100% premium silk liners are made of a highly durable ripstop 8mm silk. They have a plush feel and are ideal for when low weight and bulk are key considerations.

Features:

- Ideal sleeping sheet for travel
- Lightweight and compact
- Fast drying
- Machine washable and durable
- Strong double fold seam construction
- Luxurious soft finish
- Increases the warmth of your sleeping bag
- Keeps your sleeping bag clean

Fabric:	Premium quality 100% R/S Silk
Sizes:	Standard — 188cm x 90cm Extra Long — 207cm x 90cm Travel — 221cm x 90cm Tapered Mummy — 220cm x 90cm Double — 188cm x 180cm
Colours:	Assorted

Cotton Travel & Sleeping Bag Liner

Mont premium cotton liners are affordable and extremely comfortable, making them the ideal choice for travel or all-purpose camping.

Features:

- Ideal sleeping sheet for travel
- Machine washable and durable
- Strong double fold seam construction
- Cotton is naturally comfortable
- Increases the warmth of your sleeping bag
- Keeps your sleeping bag clean

Fabric:	Premium quality cotton
Sizes:	Standard — 187cm x 88cm Extra Long — 207cm x 88cm Travel — 230cm x 88cm
Colours:	Assorted

Thermolite Sleeping Bag Liner

Mont Thermolite® liners are made of a Dupont™ hollow core fibre that traps heat while remaining highly breathable. With a soft stretchy fabric and tapered hooded shape, a Thermolite® liner significantly boosts the temperature rating of your sleeping bag.

Features:

- Increases the warmth of your sleeping bag
- Ideal sleeping sheet for cold conditions
- Fast drying
- Extra warm brushed knit construction
- Premium quality Thermolite yarn
- Machine washable and durable
- Strong seam construction
- Stretch fabric
- Keeps your sleeping bag clean

Fabric:	100% Polyester
Size:	Tapered Mummy — 210cm x 90cm

Photo: All the gear you need to summit a volcano, Mexico – Jay Reilly collection

Mont Travel Towels

Ideal for travel, bushwalking, sporting events or any outdoor pursuit where convenience and comfort really counts. They are lightweight, compact and highly absorbent.

Features:

- Soft chamois-style, suede finish microfibre
- Lightweight and compact
- Highly absorbent
- Fast drying
- Machine washable and durable
- Available in 4 sizes

Fabric:	100% Microfibre
Sizes:	Small — 40cm x 80cm Medium — 50cm x 100cm Large — 60cm x 120cm Extra large — 75cm x 150cm

Cargo 65, 90, 120, 150

Cargos are a virtually indestructible heavy-duty duffle bag built to transport your kit anywhere. Tested by being dragged, thrown and trampled on by yaks and yak drivers in the Khumbu valley in Nepal. Baggage handlers have nothing on these guys.

Features:

- Large U-shaped zip opening provides easy access
- Zips can be padlocked for added security
- Compression straps
- Removable shoulder strap
- End on grab handles
- Outside zippered security pocket
- Inner mesh pocket

Fabric:	Heavy duty 500/1000 denier AT nylon
Volume	65, 90, 120, 150 Litres
Weight:	900g (65L), 1kg (90L), 1.13kg(120L), 1.25kg (150L)
Colours:	 Charcoal/Black

Mont Thermo Cup and Plunger

Make your friends jealous by starting the day off with a nice warm brew. For the serious coffee or tea drinker, bring the comforts of home into the bush while keeping your favourite cuppa warm and tasty. They also make a great present. Mont coffee mugs and plungers are insulated and made from stainless steel.

Mug:	350 ml
Plunger	550ml

Pack Liner

Lightweight and compact, fully seam sealed pack liner. The dry-bag style closure and durable waterproof coating ensures a dry load everytime. Also features anti-bacterial and mould resistant treatment.

Fabric:	Nylon 30d siliconised PU coated
Volume	55-70ltr, 70-90ltr
Weight:	200 gms
Colours:	Various

Pack Cover

Three panel contoured construction with shock-corded closure ensures a snug fit. Fully seam sealed with a durable waterproof coating will shield your pack in a downpour. Stuffs away into its own pocket.

Fabric:	Nylon 30d siliconised PU coated
Volume	55-70ltr, 70-90ltr
Weight:	180gms
Colours:	Various

Hibernator and Superlight Bivvy Bags

Our bivvy bags combine a spacious cut and tub walled, box foot construction, creating a truly large volume shelter. Asymmetrical top opening zips, provide easy access while the insect mesh keeps out those nasty greeblies.

Fabric:	3 layer Hydronaute™ (Hibernator) 3 layer Hydronaute PRO™ ripstop (Superlight/SL)
Length	230cm
Weight:	990gms (Hibernator), 770 gms (SL)
Colours:	 Khaki (Hibernator),  Yellow/Black (SL)

Hydronaute™ fabric technology

Hydronaute™ represents a new age in waterproof breathable fabrics.

Hydronaute™ technology fabrics are available in a number of alternatives;

- Hydronaute™, the standard in waterproof breathable fabric,
- Hydronaute Ultra 2.5™, the ultimate in lightweight performance,
- Hydronaute PRO™, the most durable waterproof breathable technology for all conditions
- Hydronaute XT™, specially designed for Mont down clothing and sleeping bags to make the best insulation even better.

The use of these fabrics takes all Mont products to a superior level of performance by incorporating the latest advances in molecular science.

Highly breathable, moisture control technology which works harder as the level of moisture vapour increases; enhancing your comfort.

High Performance Fabric Technology

Hydronaute's high performance waterproof, highly breathable and windproof technology guarantees protection in all conditions. The combination of high performance new-age face fabrics with innovative laminate technology means superior weatherproofness and enhanced comfort.

Face Fabric Selection

The face fabric is a crucial factor in the performance of Mont Hydronaute™ garments. It affects the durability, breathability and 'feel' of Hydronaute™. Our access to the most advanced face fabrics means that Mont Outerwear is technically superior to previously used fabric technologies. In particular, the face fabric in our Bushwalking range has increased abrasion resistance, tear strength and pinhole resistance.

Comfort in the Extreme

In all conditions Hydronaute PRO™ provides a superior level of performance, delivering significantly enhanced breathability while maintaining a totally waterproof and windproof barrier.

Leaving in its wake the limitations of microporous technologies, Hydronaute PRO™ fabrics, with their Hydrophylic membranes, extend the range of breathable performance in real conditions, and raises the benchmark for durable waterproof breathable technology.

Hydronaute PRO™ – Superior Breathability.

Hydronaute PRO™ utilises the latest technology in bonding the breathable membrane to the face fabric. Unlike the bonding agents of most microporous fabrics which clog pores, Hydronaute PRO's is breathable in itself. This allows for a greater volume of moisture vapour to be transported through the membrane.

This new adhesive also allows for a much stronger lamination between the membrane and face fabric resulting in a high level of durability.

The most durable waterproof breathable technology is now here.

Lightweight Performance

In all conditions, Hydronaute Ultra 2.5™ provides the ultimate in lightweight performance — delivering a high level of breathability while maintaining a totally waterproof and windproof barrier.

The combination of a lightweight face fabric, a highly waterproof breathable membrane and a unique printed polymer finish, provides superior performance in the harshest of conditions.

Hydronaute Ultra 2.5™ is the perfect balance between compact, lightweight and waterproof breathable technology.

Dry Touch

A printed polymer finish, applied to the membrane, enhances durability and eliminates the need for a bulky tricot mesh lining.

This unique 'dry touch' finish dramatically improves next to skin comfort and breathability.

The result is one of increased durability and comfort in a lightweight, compact, performance shell.

Hydronaute XT™ is the only choice when it comes to the protection of your down products from wind and moisture.

Hydronaute XT™ has been developed specifically to protect and enhance the performance of sleeping bags and down clothing. It makes the best insulation even better.

Unrivalled Durability

The Hydronaute XT™ membrane technology and lamination process is extremely durable and unlike lightly coated or silicon finished products will not diminish so the performance of your down product will be maintained for many years.

Protection inside and out

Hydronaute XT™ protects down from moisture on the outside, but it's on the inside of the bag where Hydronaute XT™ really proves its worth.

Moisture vapour produced by the body can condense in the down of the sleeping bag reducing its ability to loft.

With Hydronaute XT™, moisture vapour is pulled through the membrane via a molecular chain keeping down drier, maintaining loft and ensuring a more comfortable sleep.

Polartec® Power Stretch®

Polartec power stretch fabrics offer body-hugging 4-way stretch.

They keep you dry when you sweat and provide warmth without weight. The patented construction features two unique surfaces: the durable nylon outer is wind and abrasion resistant; the soft inner polyester layer pulls moisture away from your skin keeping you dry, warm and comfortable. Designed to be worn next to skin or layered over a lighter garment.

- Anti-bacterial treatment
- 4-way stretch
- Rapid wicking
- High warmth to weight value

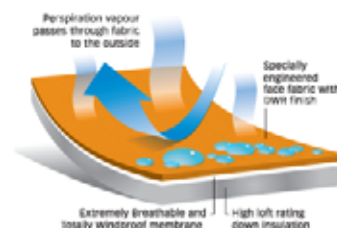

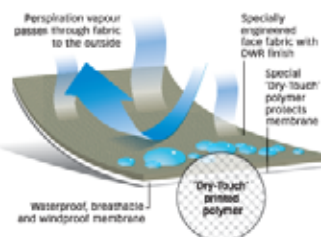

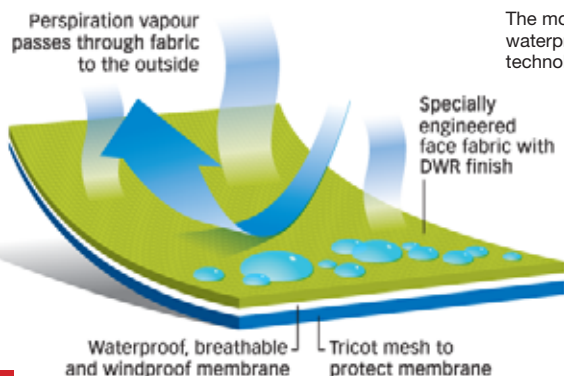

Polartec® Windpro® with Hardface®

Provides excellent protection from the elements. It gives fabrics an innovative look and feel for instant appeal that differentiates them from anything else on the market.

Technical features:

- 4 times more wind resistant than traditional fleece; greatly reduces wind chill
- Provides warmth without the weight and bulk of traditional insulating fabrics
- Water repellent surface sheds rain and snow
- Highly breathable; provides comfort in all activities; does not restrict the movement of moisture vapour
- Durable; will outlast other fleece fabrics and is machine washable

Polartec® Windpro™

Polartec Windpro™ fabrics are up to 4 times more wind resistant than standard fleeces. They provide warmth, outstanding breathability, and the lightweight comfort of fleece while offering twice the protection from wind chill. These durable, non-pilling fabrics maintain their insulating ability after repeated laundering. Windpro™ fabrics keep you warm and comfortable in a wide range of conditions.

200 Weight

Polartec 200 series fabrics with water repellency are the reference standard for lightweight warmth and breathability. These fabrics are non pilling and maintain their insulating ability after repeated laundering.

The new feel-good technology from Schoeller® Switzerland offers three functions in one. The superior 3XDRY® finish operates in three ways:

Outside — The 3XDRY® finish on your clothing repels moisture and is highly breathable. At the same time, 3XDRY® makes the garment less susceptible to soiling.

Inside — 3XDRY® transports moisture rapidly from the inside to the outside where it can effectively evaporate. This supports natural body functions and increases the overall feeling of comfort.

Incredibly Fast Drying — Garments with 3XDRY® dry significantly faster than other materials. 3XDRY® prevents shivering after active phases as perspiration cannot be trapped in the clothing. Also, garments with 3XDRY® will dry in a flash after washing.

Garments treated with 3XDRY® also feature Fresh Plus treatment, which prevents the development of bacteria and unpleasant odors.

All Schoeller® soft-shells™ fabrics used by Mont incorporate Schoeller's® outstanding 3XDRY® treatment.

Schoeller® WB-400 Extreme

Schoeller® WB-400 Extreme is an all-in-one three layer fabric which will keep you comfortably warm and dry.

The synthetic outer layer incorporates a Cordura® weave for superior abrasion resistance. The mid-layer is a breathable PU coating and the inside layer offers a variety of linings appropriate to the end user.

Schoeller® WB-400 Extreme is the optimal soft-shell fabric collection for multi-seasonal outdoor activities and is featured in Mont's Meteor and Space Junky models.

Main Characteristics

- Reliable water and wind resistance.
- Extreme air permeability (breathability).
- Hard wearing, long lasting, abrasion & pilling resistant fabrics.
- Soft, light and permanent shape retention.
- Unsurpassed comfort & true freedom of movement.
- Fast drying 3XDRY® treatment
- New technology, new looks, warmth & heat retention
- Polarguard® is a continuous filament insulation.
- Polarguard® insulation won't separate, mat or clump, which means no lumps or cold spots, and it lasts longer.
- Superior loft retention, both wet and dry.
- Warmer than other synthetics, even when wet. Won't flatten out with continued use.
- Absorbs less moisture.
- Dries faster, yielding more comfort in cold, wet conditions.
- Easy to care for.
- Can be machine washed and dried or hand washed.
- Hypoallergenic.
- Odor free, insect resistant, mildew and fungus free.

Polarguard® – Durable high performance sleeping insulation.

Polarguard® continuous filament polyester is the recognized name for durable, high-performance sleeping bag insulation.

Polarguard® 3D is the third generation product. It is the Number One premium insulation on the market today. Like Polarguard® HV, Polarguard® 3D has a high void triangular cross section, plus, Polarguard® 3D has a finer denier that gives it more compressibility and increased warmth.

Superior performance:

- Polarguard® is a continuous filament insulation.
- Polarguard® insulation won't separate, mat or clump, which means no lumps or cold spots, and it lasts longer.
- Superior loft retention, both wet and dry.
- Warmer than other synthetics, even when wet. Won't flatten out with continued use.
- Absorbs less moisture.
- Dries faster, yielding more comfort in cold, wet conditions.
- Easy to care for.
- Can be machine washed and dried or hand washed.
- Hypoallergenic.
- Odor free, insect resistant, mildew and fungus free.

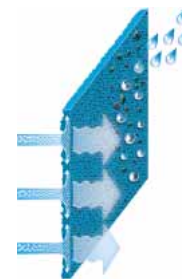

Thermolite® is a high-tech hollow fibre Dupont yarn that results in a highly efficient fleece. Thermolite® fleece offers exceptional warmth for weight due to its excellent ability to trap warm air both in the fleece pile and within the hollow core of the individual filaments that make up the pile. Thermolite® fleece has luxurious velvet feel. It is also highly pill resistant.

All Thermolite® fabrics are certified by Invista(Dupont) for performance, quality, and consistency. Fabrics are tested for the following characteristic before qualifying for the Thermolite® label:

- Warmth • Moisture management • Air permeability • Fibre content • Shrinkage

Benefits of Thermolite®

- Permanent insulating performance built into each fibre of the fabric
- Excellent moisture management without chemical fabric treatments
- Lightweight warmth that enables freedom of movement
- Soft, comfortable, non-chafing
- Shrink, wrinkle, and fade resistant
- Machine washable and dryable

T400 MICROFLEECE

Mont's Micro fleece range has been developed using a stretch micro polyester fleece that incorporates a new class of performance fibres known as T400.

These revolutionary new fibres are direct-use yarns that require no texturing or covering. Specifically designed for applications that require low to moderate stretch, T400 fibres provide greater, more durable stretch and recovery, plus a softer, smoother hand compared to textured yarns currently in use.

T400 consists of newly developed multi component yarns that are produced with a smooth helical crimp resulting in fabrics that show superior stretch and recovery properties and greater durability than those of textured yarns.

In addition to its stretch and recovery properties, the T400 fibre has a unique cross section that improves fabric breathability and moisture management.

Benefits of T400

- Relaxed stretch for improved fit and ease of movement
- Smooth hand to provide added softness and a rich appearance
- Easy care with low shrinkage and excellent wrinkle resistance
- Dimensional stability for lasting shape retention
- High tear strength assures durability

Supplex, is a 100% nylon fabric with a texture and aesthetic quality that closely mimics the natural soft feel of cotton.

Supplex performance fabrics are hard wearing, UV stable and colour fast.

The wicking characteristics and fast drying performance of Supplex ensures a high level of comfort. Resistance to shrinkage and creasing makes for easy care and maintenance.

Bug Off™ anti-mosquito treatment helps to minimize the chance of mosquito bites.

Mosquitoes and other insects are repelled by a naturally occurring plant extract embedded within the fibres of the fabric.

The Bug Off™ insect repelling fabric treatment remains active for a considerable time even after repeated washing.

Additionally, this fabric has a high UV resistance and wicks moisture away from the skin's surface.

Bug Off™ multi-function outdoor fabrics are exclusive to Mont.

Expeditions

2007	Linda Beilharz, Greenland Expedition
2005	VPET Everest Expedition, Nepal
2004	Pumori Expedition, Pakistan
2001	Everest Expedition, Nepal
1999	Young Antarctic Expedition, Antarctic
1997	Australian Dhaulagiri (8167m), Nepal
1997	Australian Broad Peak (8047m) Sth Ridge, Pakistan
1996	Korzenevskaja (7105m), Tajikistan
1995	British Nanga Parbat (8125m), Pakistan
1994	Ice Paddle, Antarctica
1994	Aust/USA Ama Dablam (6856m), Lagunak Ridge, Nepal
1991	Denali (6194m), Alaska
1990	Australian Trans-Himalayan Expedition
1988	Australian Bicentennial Everest Expedition (8848m), Nepal
1988	Baruntse (7129m), Nepal
1986	Australian Canoe Expedition, Arctic Barrenlands

Continual improvement

The information in this catalogue was correct at time of printing. Mont Adventure Equipment reserves the right to change product specifications and features in keeping with our policy of continuous product research and development. If you have suggestions for Mont products, please write to Mont Product Development at the address below. If you have high quality images of Mont products in action, send them to Mont Catalogue Production at the address below.

Warranty.

Given the appropriate care and attention, you can expect years of reliable service from Mont products. We guarantee products against faulty materials and workmanship. Failure of products due to improper care, accidents or normal wear and tear of the fabrics and components will not be covered by warranty. Should a problem arise through normal use, we will repair or replace the product at our discretion. If returning a product to its original place of purchase for evaluation, please clean it beforehand. This is a requirement of occupational Health & Safety laws.
